

Genuine Stuffs Ltd

Africa's First AI-Native Construction OS

A comprehensive audit of all brand assets — logos, colours, typography, icons, imagery, and design system tokens.

BRAND ASSETS REPORT · 2026

GENUINE STUFFS LTD · IKOYI, LAGOS, NIGERIA · GENUINESTUFFS.COM

1 Logo System

The brand maintains seven logo files across two directories — icon-only favicons, PWA manifest icons at multiple resolutions, and full wordmark lockups in both light and dark variants.

PRIMARY ICON
LOGO-GS.PNG

Genuine Stuffs
A Data-Driven Ecosystem

FULL LOCKUP — LIGHT

Genuine Stuffs
A Data-Driven Ecosystem

FULL LOCKUP — DARK

FILE	DIRECTORY	SIZE	PURPOSE	STATUS
logo-gs.png	/public/	132 KB	Primary brand icon — Navbar & Footer	Primary
favicon.ico	/public/	207 KB	Browser tab icon (multi-size ICO)	Active
favicon.png	/public/	132 KB	PNG favicon fallback	Active
logo-192.png	/public/	132 KB	PWA manifest icon (192×192)	Active
logo-512.png	/public/	132 KB	PWA icon + OG share image (512×512)	Active
logo-full-light-with-text.png	/src/assets/	167 KB	Wordmark lockup on light background	Active
logo-full-dark-with-text.png	/src/assets/	166 KB	Wordmark lockup on dark background	Active

Duplicate Resolution Alert

logo-gs.png, logo-192.png, and logo-512.png are byte-identical (132 KB each). For full PWA compliance they should each be a properly rasterised resolution-specific asset at 192×192 px and 512×512 px respectively.

Logo Component Code (Logo.tsx)

The in-app logo renders /logo-gs.png at h-10 md:h-12 alongside the Inter-set wordmark "Genuine Stuffs" (font-weight 800) and sub-tagline "A Data-Driven Ecosystem" in slate/red depending on theme and viewport.

2

Colour Palette

All colours are defined as HSL custom properties in `src/index.css` and consumed via Tailwind's token system. A single brand accent — Brand Red — is consistent across both light and dark modes.

BRAND CORE

Brand Red
hsl(354, 75%, 48%)
#D4203A · Primary / Accent / Ring

Brand Red Dark
hsl(354, 75%, 35%)
#9B1527 · Hero gradient end

Sky Blue BG
hsl(204, 100%, 97.1%)
#F0F9FF · Light background

Deep Charcoal
hsl(210, 15%, 12%)
#181E26 · Dark background

LIGHT MODE TOKENS

Card
hsl(0, 0%, 100%)
#FFFFFF

Foreground
hsl(220, 13%, 13%)
#1C1F26 · Body text

Secondary
hsl(220, 13%, 95%)
#EFF0F3

Muted Text
hsl(220, 9%, 46%)
#6B7280

DARK MODE TOKENS

Card (Dark)
hsl(210, 15%, 22%)
#2D3748

Secondary (Dark)
hsl(210, 15%, 28%)
#374151

Border (Dark)
hsl(210, 15%, 35%)
#4B5563 · 40% opacity

Destructive
hsl(0, 84%, 60%)
#F64E4E · Error states

Single Accent Principle
Brand Red hsl(354, 75%, 48%) is the only accent across both themes — applied to all CTAs, active nav links, focus rings, icon highlights, hover states, and the theme-color meta tag.

3

Typography

The brand uses a single-typeface system — **Inter** — loaded from Google Fonts at six weights (400–900). No secondary or display face is used; Inter handles everything from 42pt hero headlines to 10px ALL-CAPS labels.

Innovate. Quantify. Build.

Africa's First AI-Native Construction OS

Data-Driven Construction Operating Ecosystem

Built to restore confidence, quality, and long-term value in the built environment across Africa and beyond.

A DATA-DRIVEN ECOSYSTEM · ALL-CAPS LABEL · 10PX

ROLE	WEIGHT	LETTER SPACING	LINE HEIGHT	USAGE
H1 / Display	700 Bold	-0.025em	1.15	Page headlines
H2	600 SemiBold	-0.02em	1.2	Section headers
H3	600 SemiBold	-0.01em	1.3	Subsections
H4–H6	500 Medium	normal	1.4	Minor headings
Body	400 Regular	normal	1.6	Paragraphs
Nav Links / Buttons	700–800 Bold/ExtraBold	tight	auto	Navigation, CTAs
.type-label	600 SemiBold	0.1em	auto	10px ALL-CAPS labels
.font-display	700 Bold	-0.03em	auto	Extra-tight display override

✓

Optical Refinements Active

Inter's optical feature flags `cv02`, `cv03`, `cv04`, `cv11` are enabled globally alongside `-webkit-font-smoothing: antialiased` for the sharpest rendering on all display types. Loaded from Google Fonts CDN at weights 400, 500, 600, 700, 800, 900.

4

Icon Library — Lucide React

Lucide React is the sole icon library used across the platform. A global CSS rule sets `stroke-width: 1.5px` on all `svg.lucide` elements, giving a thinner and more professional look compared to the default 2px strokes.

GLOBAL RULE	VALUE	EFFECT
<code>svg.lucide { stroke-width }</code>	1.5px	Thinner, refined strokes vs. default 2px — consistent across all icons

Icon Colour Usage

Icons are generally coloured with Tailwind utility classes contextually: Brand Red (`text-primary`) for AI Studio and accent actions; slate-grey for neutral actions; orange (`text-orange-500`) for vendor contexts; red-600 for PM/admin roles.

5 Image Assets

The brand maintains 14 image assets across structured directories. All photography is locally stored in `/src/assets/` and served statically.

5.1 — Hero / Campaign Photography (`/src/assets/hero/`)

CITYSCAPE.PNG

CONSTRUCTION.PNG

HIGHRISE.PNG

5.2 — Before / After Transformation

BEFORE · TOWN_BEFORE_1.PNG

AFTER · TOWN_AFTER_1.PNG

BEFORE · TOWN_BEFORE_2.PNG

AFTER · TOWN_AFTER_2.PNG

5.3 — Thematic / Brand Values (/src/assets/thematic/)

5.4 — Supporting Photography (/src/assets/)

5.5 — Asset Directory Structure

DIRECTORY	CONTENT TYPE	NOTES
/src/assets/hero/	Hero & campaign photography	7 PNG files — cityscape, construction, highrise, before/after
/src/assets/thematic/	Brand value visuals	2 PNG files — trust, value
/src/assets/	Supporting photography	3 JPG files — consultation, materials, hero-construction
/public/images/blog/	Blog article thumbnails	Served statically from public directory
/public/images/cats/	Marketplace category icons	Served statically
/public/images/materials/	Product / material images	Served statically
/public/images/pros/	Professional profile photos	Served statically

6

Design System Tokens

Beyond colour and type, the design system defines tokens for radius, shadows, gradients, animation timing, and glass/surface effects — all powering the premium look and feel.

Border Radius

TOKEN	VALUE	USAGE
--radius (base)	0.5rem · 8px	Default input & button radius
rounded-2x1	1rem · 16px	Buttons, nav pills, dropdown items
rounded-3x1	1.5rem · 24px	Modal dialogs, mobile overlays
rounded-[2.5rem]	2.5rem · 40px	Premium app cards (.app-card)

Shadows

TOKEN	CSS VALUE
--shadow-subtle	0 1px 3px 0 rgb(0 0 0 / 0.1)
--shadow-medium	0 4px 6px -1px rgb(0 0 0 / 0.1)
--shadow-large	0 10px 15px -3px rgb(0 0 0 / 0.1)

Gradients

--hero-gradient
Brand Red gradient

.premium-gradient
Red → Black

Cover / dark overlay
Charcoal → Red

Mesh background
Radial + charcoal base

Animation & Motion

TOKEN / CLASS	VALUE	PURPOSE
--transition-base	all 0.2s cubic-bezier(0.4,0,0.2,1)	Standard UI interactions
.animate-cascade-in	0.8s cubic-bezier(0.16,1,0.3,1)	Page-load spring entrance
accordion-down/up	0.2s ease-out	Accordion open/close
Mobile override (≤768px)	transition-duration: 0ms	All animations disabled for performance

Glass & Surface Effects

CLASS	BACKDROP BLUR	BACKGROUND	BORDER
.glass-card	backdrop-blur-xl	white/70 · black/60	white/20 · white/5

CLASS	BACKDROP BLUR	BACKGROUND	BORDER
.app-card	backdrop-blur-xl	white · slate-900/40	slate-100 · white/5
.bento-card	blur(20px)	var(--glass-bg)	var(--glass-border)
Mobile nav overlay	blur(20px)	rgba(8,47,73, 0.88)	sky-400/20

7

Brand Metadata & Summary

PROPERTY	VALUE
Full Name	Genuine Stuffs Ltd
Tagline	Africa's First AI-Native Construction OS
Sub-tagline	A Data-Driven Ecosystem
Mission Statement	Innovate. Quantify. Build.
Domain	genuinestuffs.com
Email	contact@genuinestuffs.com
Location	Ikoyi, Lagos, Nigeria
Social Presence	LinkedIn
OG Share Image	/logo-512.png (512×512)
Theme Color (meta)	#ef4444 (Tailwind red-500)
Canonical URL	https://genuinestuffs.com/
Font CDN	Google Fonts — Inter (wght@400;500;600;700;800;900)
Icon Library	Lucide React (stroke-width: 1.5px global)
CSS Framework	Tailwind CSS + custom HSL design tokens
Dark Mode Strategy	Class-based (.dark) via ThemeProvider context

✔ BRAND STRENGTHS

- Single typeface (Inter) — tight, clean hierarchy across all 8 weights
- Brand Red applied uniformly across both light and dark themes
- Complete logo suite: favicon, PWA icons, OG image, light & dark lockups
- Glass, mesh gradient & bento effects give a premium modern feel
- Full HSL token system — highly maintainable and themeable
- Mobile-first with hard animation overrides for performance

⚠ OPPORTUNITIES

- logo-192 & logo-512 are byte-identical — need proper resolution rasters
- Vendor orange, PM red-600 are ad-hoc in components — should be named tokens
- App.css has leftover Vite scaffold code (logo-spin) — dead code
- No brand style guide document exists in the repository
- theme-color meta (#ef4444) doesn't exactly match Brand Red (#D4203A)
- No SVG logo available — only PNG variants exist

- Narrative before/after photography supports transformation story
